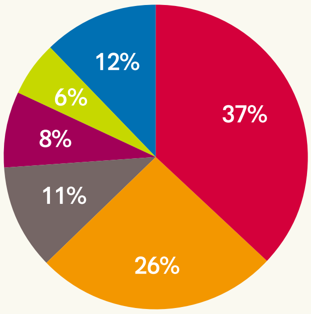
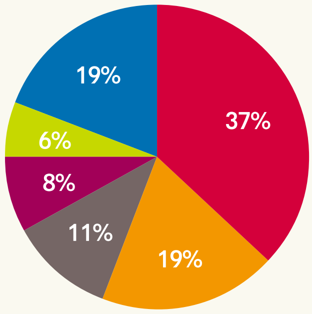
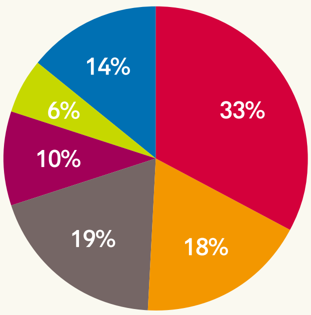
VALUE OF NEW BUSINESS (2)(7)



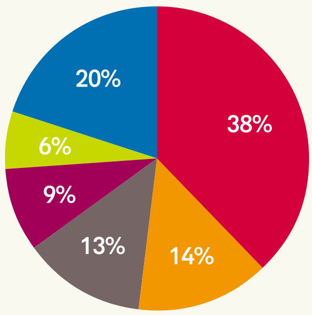
ANNUALISED NEW PREMIUMS (3)



OPERATING PROFIT AFTER TAX (4)



TOTAL WEIGHTED PREMIUM INCOME (5)



Notes:

(1) The financial information from 2017 to 2019 is presented on the 31 December financial year-end basis. The financial information from 2015 to 2016 is presented on the 30 November financial year-end basis. For clarity, the growth rates are presented on the 31 December financial year-end basis.

(2) Value of new business (VONB) is the present value, measured at the point of sale, of projected after-tax statutory profits emerging in the future from new business sold in the period less the cost of holding the required capital in excess of regulatory reserves to support this business.

(3) Annualised new premiums (ANP) is a measure of new business activity that is calculated as the sum of 100 per cent of annualised first year premiums and 10 per cent of single premiums, before reinsurance ceded.

(4) Operating profit after tax (OPAT) is shown after non-controlling interests.

(5) Total weighted premium income (TWPI) consists of 100 per cent of renewal premiums, 100 per cent of first year premiums and 10 per cent of single premiums, before reinsurance ceded.

(6) Embedded value (EV) is an actuarially determined estimate of the economic value of a life insurance business based on a particular set of assumptions as to future experience, excluding any economic value attributable to future new business. EV Equity is the total of embedded value, goodwill and other intangible assets.

(7) Based on local statutory basis, before unallocated Group Office expenses and deduction of the amount attributable to non-controlling interests, VONB by segment includes pension business.

(8) In 2019, ANP and VONB for Other Markets include 49 per cent of the results from our joint venture in India, Tata AIA Life Insurance Company Limited (Tata AIA Life), to reflect our shareholding. ANP and VONB for 2018 and before have not been restated and do not include any contribution from Tata AIA Life. The total reported VONB for the Group in 2019 excludes the VONB attributable to non-controlling interests. VONB for 2018 and before have not been restated and are reported before deducting the amount attributable to non-controlling interests, as previously disclosed. The IFRS results of Tata AIA Life are accounted for using the equity method. The results of Tata AIA Life are accounted for on a one quarter lag basis in AIA's consolidated results. For clarity, TWPI does not include any contribution from Tata AIA Life.
